Training on the new
Rainforest Alliance Standard 1.4

From October 2025, the new Rainforest Alliance Standard 1.4 comes into effect. To support you in ensuring a smooth implementation, **BM Certification offers a practical, hands-on training that highlights the key changes.**

The training will also cover:

- Use of the RA Portal
- Registration and certification cycle (including revised audit frequency)
- Verification levels: What they mean and how to request them?
- Where to find essential information
- How to interpret specific Standard requirements
- Self-assessment and requirement list: What needs to be provided?
- Proof of Standard compliance: what is expected
- Audit process overview
- Responsibilities of representatives, multi-site managers, and site managers
- Core activities in MultiTrace & Marketplace
- Additional topics, e.g., the EUDR module (if required and upon participants' request)

As your certification partner, we provide clear answers — compact and practice-oriented, in **trainings with a maximum of 20 participants**.

After the training, you will be equipped to effectively implement, further develop, and maintain the system within your company. As proof of participation, you will receive a training certificate.

We look forward to your participation. Please use the registration form:
