

Business Continuity Overview (Informative seminar)

Cyber attacks, natural disasters, crises and other circumstances can have a very serious impact on business, with the result that can interrupt business continuity. In order to reduce the impact of such factors and maintain the company's reputation, the company should implement Business Continuity Management System.

BM Certification in cooperation with TDL SCHOOL offers a free informative seminar on Business Continuity Overview.

The target audience of the seminar:

- Managers who supervise Quality Management System;
- Without prior knowledge in maintaining Business Continuity systems;
- Any person who conducts supplier evaluations or prepares documentation for procurement.

Seminar content overview:

The seminar participants will be introduced to the Business Continuity standard ISO 22301, requirements, structure, content. During the seminar, the importance of requirements and their impact on the company's organization will be explained.

After successfully completing this course you will be able to:

- Understand the concepts, approaches, methods, and techniques used to implement a Business Continuity Management System;
- Understand the basic elements of a Business Continuity Management System.

By attending this course, you will understand the importance of a Business Continuity Management System and the benefits that businesses, society and governments can obtain.
