

ISO 14064-1: 2018 INTRODUCTION TRAINING

Organization Level Greenhouse Gas Assessment

TRAINING OBJECTIVES

The objective of this ISO 14064-1:2018 Introduction Training is to provide participants with a foundational understanding of the principles, requirements, and implementation guidelines of the ISO 14064-1 standard, focusing on greenhouse gas (GHG) accounting and reporting.

TRAINING PROGRAMME

An insight into the structure of the ISO 14064-1 standard

- Applications of International Standards, Protocols, Guidelines and Methodologies for Carbon Footprint Assessments
- Overview of ISO 14064-1 Standard
 - ✓ The structure, terminology and principles of ISO 14064-1
 - ✓ Understanding organizational boundaries & reporting boundaries
 - ✓ Identification of GHG emissions and removals and selection of quantification approach
 - ✓ Selection, establishment and review of Base-year management
 - ✓ GHG inventory quality management
 - ✓ GHG reporting and GHG verification process

WHO SHOULD ATTEND THIS COURSE?

This is a fundamental ISO14064-1 awareness course suitable for individuals at all levels within an organization, including those who seek to expand their understanding of ISO 14064. It's especially valuable for individuals responsible for their company's organizational GHG emissions, as well as for carbon and environmental consultants.

YOU WILL BENEFIT FROM THIS TRAINING BY:

1. Understanding the key principles of greenhouse gas (GHG) emissions.
2. Defining the GHG emission boundaries for your organization.
3. Quantifying and reporting on your organization's GHG emissions.
4. Understanding GHG emission reduction initiatives that can be implemented in your organization.
5. Becoming familiar with GHG emissions verification processes.
