Seminar
Rainforest Alliance

bm certification

The transition from UTZ to Rainforest Alliance in the certification process has been completed. The first year after the transition raises a number of questions.

BM Certification is therefore offering a training course that will answer the following questions, among others:

- RA registration process / new licenses

- RA Portal and Multi-Trace (Which steps are to be carried out where and how?)

- Verification level (Where and how to get it and what does it mean for our company)

- CAF application form, latest version required?

- Where do I get which information?

- How are certain queries/requirements to be interpreted?

- Self-assessment and list of requirements. What should be entered?

- Standard requirements: Focus on the supply chain.

- What is expected of the company as proof of compliance?

- Audit process

Differences between RA transition and regular audit: time required, RA requirement for the number of employees to be interviewed, determination of audit intervals, etc.?

As your certification partner, we have the right answers to these and many other questions. We offer the following program as part of seminars with a maximum group size of 20 people:

- Presentation of the standard and the explicit changes

- Responsibilities of representatives, multi-site managers and site managers

- Certification cycle including deadlines

- Further topics (if required and at the request of the participants)

After successful participation, you will have valuable tools at hand to implement, improve and maintain the system in your company. You will receive a certificate from us confirming your participation in the detailed training course.

Place:
 ONLINE

Date:
8.05.2024
