

Rainforest Alliance training

The transition from UTZ to Rainforest Alliance (RA) has been successfully completed. Nevertheless, the system continues to raise many questions.

BM Certification, therefore, offers a training session that addresses the following topics, among others:

- RA registration process / new licenses
- RA portal and Multi-Trace (What steps need to be taken, where, and how?)
- Verification levels (Where and how do I obtain this, and what does it mean for our company?)
- CAF application form – is the latest version required?
- Where can I find specific information?
- How should certain queries/requirements be interpreted?
- Self-assessment and requirements list – What needs to be provided?
- Standard requirements: Focus on the supply chain.
- What evidence of compliance is expected from the company?
- Audit process
- Certification cycle, including deadlines

As your certification partner, we have the right to answer to these and many other questions.

In seminars with a maximum group size of 20 participants, we offer the following program:

- Detailed introduction to the standard
- Responsibilities of appointed officers, multi-site managers, and site managers
- Multi-ingredients
- Mass balance for multi-ingredients
- Advanced topics, e.g., EUDR module (as needed and upon participants' request)

After successfully completing the training, you will have valuable tools to implement, improve, and maintain the system in your company. As proof, you will receive a certificate of participation in the comprehensive training.

We look forward to your participation.
