

ISCC EU and PLUS seminar

BM Certification offers a training session that addresses the following topics:

- Explanation of the voluntary schemes usage to be in compliance with RED directive,
- Explanation of the standard requirements according to different scopes,
- Product groups,
- Adding additional products to scope in period of validity of certificate,
- Registration to the ISCC HUB system,
- ISCC fees structure for the companies,
- Documentation / procedures / instructions required by the ISCC standards,
- Trainings, internal audits and management review,
- Mass balancing approach (accounting system) in ISCC,
- GHG calculations and verifications,
- Certification process and surveillance visits,
- Questions and answers.

After successfully completing the training, you will get understanding and competences to implement, improve and maintain your ISCC system within the company.

As proof, you will receive BM Certification ISCC seminar attendance certificate.
