

CERTIFICATION. COMPLIANCE. TRAINING.

ISCC EU AND ISCC PLUS STANDARDS SEMINAR

ISCC EU and ISCC PLUS schemes training objectives:

- Global market demand in EU and outside EU for transportation, aviation, food, agriculture, energy and heating sector.
- Compliance with Renewable Energy Directive (RED).
- Understanding of ISCC standard requirements.
- Understanding of GHG calculations and evaluation.

BM Certification offers a training session that addresses the following topics:

- Explanation of voluntary schemes usage to be in compliance with RED directive;
- Explanation of the standard requirements according to different scopes;
- Products groups;
- Adding additional products to scope in period of validity of certificate;
- Registration to ISCC HUB system;
- ISCC fees structure for companies;
- Documentation / procedures / instructions required by ISCC standards;
- Trainings, internal audits, and management review;
- Mass balancing approach (accounting system) in ISCC;
- GHG calculations and verification;
- Certification process and surveillance visits;
- Questions and answers.

After successfully completing the training, you will get understanding and competences to implement, improve and maintain your ISCC system within the company.

As a proof, you will receive BM Certification ISCC seminar attendance certificate.
